EDUCATION

Manipal Institute of Technology (MAHE), Manipal

B.Tech, Computer Science & Engineering

2nd Year • Class of 2029

CGPA: 9.07 (First Year)

ICSE (Class X): 96%

ISC (Class XII): 95.25%

TECHNICAL SKILLS

Languages

C, C++, Java, Python, JavaScript, HTML, CSS

Frameworks & Platforms

Flutter, Firebase Studio, Android Studio, Google AI Studio, VS Code, Git/GitHub

Concepts

DSA, Data Preprocessing & Visualization, ML Prediction Models, REST APIs

AI-Assisted Dev

Gemini API, Claude, and other LLM tools for coding & prototyping

CERTIFICATIONS

Programming for Everybody — University of Michigan, Coursera (2026)

Data Analysis with Pandas & Python — Packt, Coursera (2026)

Complete Python Bootcamp — CodeWithHarry (2025)

Ultimate Web Development Course — CodeWithHarry (2025)

Fundamentals of Data Visualization — The Data Alchemists, MIT Manipal (2026)

LANGUAGES

English — Fluent

Hindi — Fluent

HOBBIES & INTERESTS

Creative Writing

Photography

OBJECTIVE

Second-year Computer Science undergraduate seeking a Software Engineering or AI/ML internship to gain hands-on, large-scale engineering experience. Builds AI-powered, full-stack mobile and web applications spanning data structures, machine learning, API integration, and UI design.

PROJECTS

StudyMate AI

Flutter, Gemini API, Firebase

- Built an AI-powered study companion offering note-taking, quizzes, flashcards, mind maps, PDF tools, streaks, and badges.
- Integrated Gemini-powered assistance for PDF summarization, content insights, automated notes, and reminders/timetables, cutting students' study-prep time by ~30% by consolidating tools into a single workspace.

DeepScholar AI

Flutter, Gemini API

- Extended StudyMate AI into a research-focused tool with an assistant mode that builds personalized schedules/planners and summarizes research material on demand.

Task Tracker (To-Do App)

HTML, CSS, JavaScript

- First full-stack web project; built a task list manager for creating, tracking, and completing to-dos, establishing core front-end fundamentals.

ML Prediction Models

Python, Pandas, scikit-learn

- Built and trained basic supervised-learning prediction models to learn the end-to-end ML workflow, from data cleaning to evaluation.

Data Visualization Projects

Python, Pandas, Matplotlib

- Practiced the full data pipeline — preprocessing, exploratory analysis, and chart-driven storytelling — to derive and present actionable insights.

ACTIVITIES & LEADERSHIP

- Hackathon Finalist, KAIROTIC (KAIROS Tech Week 2026):** Reached the final round with Team YAKS in a university-level hackathon organized by ACM-W, Manipal Institute of Technology.
- Inter-College Athletics — 2 Bronze Medals:** Won bronze in Javelin Throw and Discus Throw at an inter-college sports tournament.
- Presentation & Leadership:** Regularly takes the lead role in group projects, structuring and presenting work in front of class.
- TDA Summer Bootcamp, The Data Alchemists Club, MIT Manipal:** Completed an intensive program covering Agentic AI, DSA, AI/ML, Data Visualization, and Web Development.
- Member, IECSE Technical Club, MIT Manipal:** Active participant in technical workshops and events.
- Volunteer, AIESEC (6 months):** Communicated and coordinated with cross-country exchange participants, guiding them through their exchange journey.
- Competitive Programming:** Active on LeetCode; participated in a coding contest.

Flexible and enthusiastic learner with a positive, problem-solving mindset — driven to deliver strong results, equally in engineering and management roles.
