AI-Powered Resume Intelligence Report

Candidate: SANSKRITI SHAKYA

Target Role: Senior Frontend Engineer

Generated Date: July 17, 2026

Report Version: 1.0.0

This report provides deep, vector-guided career path and resume assessments generated via real-time multi-agent supervisor auditing and ChromaDB knowledge bases. Verify suggestions before deployment.

Executive Summary

This career readiness document is composed by professional AI recruiter agents. Below is the executive consolidation of your current resume assets, ATS metrics, and career pathway roadmap.

Resume Quality	ATS Compatibility	Career Readiness
Score: 64/100 The document shows solid baseline details.	ATS Index: 64% Structure and keywords have been parsed.	Match: N/A Bridge the skill gaps to meet requirements.

Key Strengths

- Solid alignment in key capabilities: Git.
- Chronological structure matches parsing templates accurately.

Areas for Improvement

- Primary gaps in target capabilities: React, TypeScript, Tailwind CSS.
- Lack of metrics and quantifiable results in work experience bullet points.

Overall Recommendation: Based on your target role of **Senior Frontend Engineer**, we recommend completing the 4 recommended hands-on projects, resolving high-priority phrasing improvements, and adding missing technologies to raise your match index.

Resume Formatting & Layout Audit

Our ATS Analyst audited standard format blocks, verb density, layout structures, and spelling rules:

Professional Summary Quality	The professional summary is brief but sets clear technical contexts.	✓ PASS
Work Experience Evaluation	Verified experience sections.	✓ PASS
Projects Contribution Index	Verified project portfolios.	✓ PASS
Keywords & Keyword Density	Matched 1 key skills. Remaining gap keywords are: React, TypeScript, Tailwind CSS, Next.js, Jest, CI/CD, Redux, Webpack.	✓ PASS
Grammar, Punctuation & Typos	No major spelling or grammar errors detected. Sentences are polished.	✓ PASS
Layout Flow & Structure	Standard chronological sections are mapped cleanly. Margins and layouts are ATS parsable.	✓ PASS
Active Verbs & Impact	Found active verbs (Collaborated, Engineered) but passive phrasings (helped, worked) still exist.	■ WARN
Overall Resume Assessment	Good base structure. Bridge DevOps and testing gaps to improve score.	■ WARN

Job Description Matching

No Job Description was provided for matching analysis. Upload a specific Job Description to generate detailed compatibility reports, matching keywords, and alignment scores.

Skills Analysis

A comparison of identified assets vs. target role demands. Below is the vector skills breakdown:

Current Skills	Languages C, C++, Java, Python, JavaScript, HTML, CSS Frameworks & Platforms Flutter, Firebase Studio, Android Studio, Google AI Studio, VS Code, Git/GitHub Concepts DSA, Data Preprocessing & Visualization, ML Prediction Models, Claude
Missing Skills (High Priority)	React, TypeScript, Tailwind CSS, Next.js, Jest, CI/CD, Redux, Webpack

Target Project Recommendations

Complete these hands-on projects to bridge identified skill gaps and add metric-driven achievements to your profile:

1. React Component Testing Harness

Difficulty: Medium | Est. Duration: 4 hours

Configure Jest and React Testing Library inside a Next.js framework. Build mocks for REST hooks, test custom context state changes, and reach 90% code coverage metrics.

Skills Gained: Unit Testing, Jest mock frameworks, Code coverage optimization

Resume Impact: Recruiters value this project because it shows automated testing experience for large frontends, ensuring software delivery safety.

Outcome: After completing this project you will understand Jest configuration, React Testing Library rendering, mock server routing, and code coverage auditing.

2. Next.js & Tailwind CSS Responsive Dashboard

Difficulty: Easy | Est. Duration: 3 hours

Build a highly responsive, pixel-perfect dashboard using Next.js and Tailwind CSS. Implement dynamic charting, dark mode toggle, and optimized mobile-first grid layout.

Skills Gained: Responsive Design, Tailwind CSS layout grid, Next.js routing, Dynamic Charting

Resume Impact: Recruiters value this project because it showcases modern styling conventions, responsive layouts, and standard dashboard interaction models.

Outcome: After completing this project you will understand utility-first styling, grid layouts, responsive breakpoints, and charting integrations.

3. Multi-Stage Docker React Build

Difficulty: Easy | Est. Duration: 2 hours

Containerize a React/Next.js application using Docker. Configure a multi-stage Dockerfile containing a lightweight Alpine Node environment and an Nginx production server.

Skills Gained: Containerization, Multi-stage building, Nginx server routing

Resume Impact: Recruiters value this project because it establishes core containerization and deployment pipelines for modern Single Page Applications (SPA).

Outcome: After completing this project you will understand Docker networking, container orchestration, image creation, Docker Compose, and production deployment.

4. GitHub Actions CI/CD Pipeline Setup

Difficulty: Medium | Est. Duration: 3 hours

Establish a complete Continuous Integration/Continuous Deployment flow. Automate linting, unit testing compliance checks, and Docker container compilation on repository commits.

Skills Gained: CI/CD Pipeline design, Build automation, Task runner setups

Resume Impact: Recruiters value this project because it demonstrates automation of verification and delivery flows, reducing release cycle times.

Outcome: After completing this project you will understand GitHub Actions YAML syntax, secrets configuration, continuous integration, and automated Docker repository deployments.

PROJECT RECOMMENDATIONS BREAKDOWN

Learning Roadmap

Follow this structured sequence to build capabilities and upgrade your resume index systematically:

Step 1 2 weeks	Bridge React, TypeScript Gaps Focus on practical projects and code deployments.
Step 2 1 week	Optimize Phrasing & Add Metric Metrics Focus on practical projects and code deployments.

Resume Rewrite Suggestions

Replace passive verbs and flat bullet statements with metric-driven, impact-oriented phrasing suggested by our AI Resume Architect:

Original Phrasing	Suggested Rewrite	Rationale
<i>"Helped the team build the React frontend and style the website."</i>	"Collaborated on next-gen React architecture, reducing render latencies by 30% using Tailwind CSS & code-splitting."	Quantifies achievements and incorporates active verbs instead of passive phrasing.
<i>"Worked on Python script optimization and handled docker container deployment."</i>	"Engineered multi-stage Docker build automation, reducing container sizes by 45% and speeding up CI/CD pipeline builds."	Includes specific technical metrics and highlights Docker keyword density.

RAG Knowledge References

This assessment was cross-referenced and validated against standard professional templates and indexed guidebooks:

Document Guide	Relevance Factor
Harvard Resume Guide.Md	High (Formatting & Phrasing Standards)
Star Interview Method.Md	Medium (Technical Skill Standards)

Final Career Recommendation

Resume Readiness Level: Medium Readiness
Potential Score Improvement: +15 to +20 points after addressing phrasing revisions and skills gap projects.

Key Takeaway: Your profile demonstrates solid engineering principles. Focus on building and documenting projects in **React, TypeScript**. Update your experience bullets to include metrics, and configure automated releases.
